Self-Managed Service Portal

Customers gateway to seamless control over their utility services. We believe in putting them in charge, making it easier than ever to manage their account, monitor usage, make payments and access important information at their convenience. Our portal is designed with simplicity in mind. Enjoy an intuitive and user-friendly interface that ensures a seamless experience, even for those new to online account management.

Our robust security measures ensure the confidentiality of data, allowing them to manage their account with confidence.

Account Overview: Access a snapshot of their account, including current balances, billing history, and upcoming due dates. Stay informed about their utility usage with intuitive graphs and charts.

Usage Insights: Dive into detailed insights about your utility consumption. Track usage patterns, identify energy-saving opportunities, and make informed decisions to optimize efficiency

Notifications and Alerts: Customize their notification preferences. Receive alerts for upcoming bills, payment confirmations, and any important updates, ensuring they are always in the loop.

Service Requests: Submit and track service requests easily. Whether you need to report an issue, request a meter reading, or inquire about a specific service, our portal streamlines the process for them

Professional Services

Our talented professional services team can extend Quickcom's capabilities or integrate it with your existing legacy or third party systems. We have a dedicated creative team for designing and setting up templates like resident statements, notices, termination letters etc

Quickcoms

We provide software solutions that deliver powerful personalized marketing and customer communication messages utilizing cross-media delivery channels such as print, email, SMS, WhatsApp, Purls and video. We are a global company linked by shared goals, a solid methodology and relentless focus on customer. We are nible enough to provide one-of-a-kind solution that matches our customer's unique needs.

The screenshot displays the ARCET Utility Services Self-Managed Service Portal. At the top, the user is logged in as Mark Gibson with account # 345666. The main dashboard shows the account name, service address (457 Old Street, Austin, TX 78750), and a current balance of \$137.00 due on September 21, 2023. A usage history bar chart compares 2023 and 2024 usage, showing a peak in June 2023. The interface also includes sections for Alerts, Electronic Statements, and News & Events. The footer contains quick links, address, and customer care information.

Technology

Quickcoms is built using open technologies that support cloud-first architecture. The built-in proprietary composition engine is capable of generating extremely highvolume print output. The technology can scale both horizontally and vertically.
